

# PAYPER

BAGGING AND PALLETIZING

INNOVATION & COMMITMENT

COMPANY AND PRODUCTS

PAYPER was founded in Lleida (Catalonia) in 1973 as a pioneering company, specialised in the **design and manufacturing of machinery for weighing, bagging and palletising**.

It is currently the largest Spanish manufacturer and a **worldwide reference in bagging technology**. It has a workforce of 100 highly qualified and committed professionals, who are undergoing constant training

and development. It also counts with four subsidiaries covering Central Europe, America and Asia and with two design and production sites, one for weighing/bagging technology and another one for palletising.

ACTIVITY

THE BAGGING EXPERIENCE

PAYPER's activity is focused on **studying and designing custom-tailored solutions for the bagging and palletizing of bulk solids**, powders or granulates, serving in particular Chemical Industry, Food Industry, Animal Feed, Construction and Mineral Industry. The company prides itself in delivering high-performance and long-lasting turnkey installations.

The key brand values worldwide are:

- 40 years of experience and more than 4000 machines installed.
- Wide range of bagging and palletising machines.
- Quality and reliability of all equipment manufactured.
- Continuous innovation and business commitment.
- Customer focused sales and after-sales service network.

CONTINUOUS INVESTMENT IN R&D+I

Automatic bags palletizers						TOP LOAD					ROB LOAD	TOP LOAD

	Year	70	75	80	85	90	95	00	05	10	15		
		Range evolution								Latest innovations			

With a permanent investment in **R&D+I** representing about 5% of its turnover, PAYPER continuously offers cutting-edge solutions. It has **patents in several countries**, which demonstrates a great international innovating vocation.

All the machines are designed to meet the different industrial technical standards, such as **MID, CE or ATEX**. Payper is also a member of EHEDG.

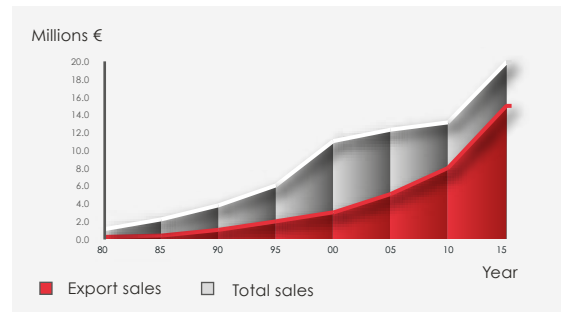

## GEOGRAPHICAL AREA

The Global expansion and market penetration of Payper is today a reality. The company exports to more than 70 countries, which represents around 80% of its turnover.

The sales and technical service network covers more than 40 countries, with a subsidiary in Mexico, covering the demands of the North and South American market and another three located in Brazil, India and France. The company also counts with sales representatives strategically located in different countries.

## TECHNICAL SERVICE

A large team of technical service engineers operates from the main site and relative service providers abroad in order to provide fast and efficient technical service.

The ongoing training of our highly skilled technical engineers guarantee a personalised quality service in all service tasks:

- Installations and commissioning.
- Breakdowns, calibrations.
- Diagnostics and preventive maintenance.
- Guarantee extensions.
- Spare parts.
- Training courses for line operators.

## ELECTRONIC WEIGHT CONTROLLERS

**MCB+**  
Touch-screen weight controller.  
High performances.

**EWC+**  
Digital weight controller.  
Easy to use.

**CC800**  
In-line checkweigher with electronic weight controller mod. SCB01.  
For unit loads up to 50 kg.

MID ■ CE M06

All PAYPER electronic weight controllers are designed in concordance with MID Regulations.

## NET SCALE BAGGING MACHINES

**PN20 CAD**

**PN90 CTS**

**PN90 CGS**

**PN90 CGS-T**

### PN

Net scales with different dosing systems according to product properties, can be implemented with an automatic bag placer or manual bagging spout.  
Capacity up to 2200 cycles/hour of 25 kg.

## GROSS SCALE BAGGING MACHINES

**PB12**  
Simple installation, low maintenance.

Gross scales with different dosing systems according to product properties, can be implemented with an automatic bag placer or manual bagging spout.  
Capacity up to 600 cycles/hour of 25 kg.

**PB15**  
Specially designed for handling difficult products.

## OPEN MOUTH BAG PLACERS

### CSA MD

Capacity up to 1600 cycles/hour of 25 kg.

### CSAC

Capacity up to 2000 cycles/hour of 25 kg.

### KID BAG MD

Capacity up to 1600 cycles/hour in bags of 1.5 to 5 kg.

## WEIGHT BAGGING MACHINES FOR VALVE BAGS

### EFI

Air injection bagging machine.

### PBV06

Gravity gross scale bagging machine.

### PFG10

Air packer.

**ASSAC**

FFS bagging station form-fill-seal the bags from a plastic roll.  
Production up to 2200 cycles/hour of 25 kg.

**STV**

Ultrasound sealing system for valve bags.  
Capacity up to 1000 cycles/hour.

**PF610 + CSV**

Installation with automatic bag placer for valve bags.

Storage of up to 180 empty bags:

- Horizontal
- Vertical (new)

Capacity up to 2200 bags/hour of 25 kg.

## BIG-BAGS FILLING STATIONS

### BIG BAG

Boxes, octabins and big-bag filling station (with 1 or 4 handles).

From 500 to 2000 Kg/Big-bag.

## AUTOMATIC BAG PALLETIZERS

### TOP LOAD

High Level Palletizer in layers up to 2500 bags/hour.

### ROB LOAD

Robotic palletizer up to 1600 bags/hour.

## COMPLEMENTARY EQUIPMENT

Complementary equipment for the completion of turnkey installations:

- Bulk handling prior to bagging.
- Bag handling and closing.
- Pallet protection and conveying.
- Software for process monitoring.

Automatic stretch wrappers for palletized loads.
